Further reference is also invited to this Department's O'M. No. 19/19.

The purpose of the Employment Exchange is to assist individuals in finding employment. The Exchange operates under the Employment Exchange Act, 1954, which provides for the establishment and maintenance of Employment Exchanges in all parts of India.

The Exchange's primary function is to match job seekers with potential employers. It provides various services, including job matching, skills testing, and vocational training. Individuals who register with the Employment Exchange are provided with assistance in seeking employment through various channels, such as job fairs, seminars, and workshops.

In addition to job placement services, the Employment Exchange also offers other programs aimed at promoting employment and economic development. These programs may include vocational training programs, business development services, and assistance to start-ups.

The Employment Exchange is an integral part of the Government's efforts to create employment opportunities and promote economic growth. It plays a crucial role in connecting job seekers with potential employers and providing them with the necessary support to succeed in the job market.

Through this Employment Exchange, we aim to contribute to the development and growth of the Indian economy. By providing job seekers with timely and effective assistance, we hope to help them find employment and lead fulfilling lives.

We encourage all job seekers to register with the Employment Exchange and take advantage of the services and programs offered. Together, we can work towards a brighter future for all.
The Department of Labor, OIRA, 1201 Constitution Avenue, NW, Washington, DC 20573, has prepared a draft environmental impact statement (EIS) for the proposed Environmental Protection Agency (EPA) regulations to revise the National Pollutant Discharge Elimination System (NPDES) permit program for the treatment of wastewater from the chemical industry. The draft EIS, entitled "Environmental Impact Statement for Revisions to the National Pollutant Discharge Elimination System (NPDES) Permit Program for the Treatment of Wastewater From the Chemical Industry: Final EA," is available for public review and comment. The public comment period for the draft EIS is scheduled to run through November 10, 2017.

The draft EIS assesses the potential environmental impacts of the proposed regulations on the chemical industry and the surrounding communities. The draft EIS also provides information on the proposed regulations, including the proposed revisions to the NPDES permit program for the treatment of wastewater from the chemical industry.

The draft EIS is available for public review and comment at the following website: <https://www.epa.gov/npdes/npdes-permit-program-treatment-wastewater-chemistry-industry).
